

# Roto brush

## Electric Rotary Brush System

Very effective in cleaning ducts of less than 6 inches diameter. Excellent cleaning tool for ducts in constrained spaces such as houses, small offices, ships and submarines. The brush is connected to the pneumatic hand drill via a flexible shaft. The flexible shaft takes the shape of the duct and thus reduces cleaning time and manpower required — by cleaning the duct in one shot instead of section by section.

**Air Compressor  
required**

**Speed Control in  
both direction**

## Technical Specifications :

**Drive :** Direct Drive

**Control :** ON/OFF with Speed & Direction Control

**Shaft Speed :** Variable speed depending on air pressure

**Shaft Length :** 8 meters

**Brush Size :** Between 4 to 6 inches.

**Note :** External Air Compressor is required to be purchased separately
